Wednesday 12th of November – 10:00 am to 12:00 pm
Research Seminar
OFCE, ground floor
69, quai d’Orsay 75007 Paris

With Galiya Sagyndykova, PhD Candidate in Economics

Fields of interest
* Labor Economics, Economics of Education
* Applied Econometrics, Industrial Organization

Employment and Hours for Two Labor Inputs

Employer choices over employment and the work week in the presence of two labor inputs: production and non-production. The Cobb-Douglas technology is used to demonstrate both the theoretical application and the empirical estimation issues associated with modeling labor demand.
